

Team Leader – C#, .Net, ASP.Net

(Immediate Requirement)

Req. # 5051

About Company:

NISC Export Services (NES), a strategic software development partner of EBSCO Information Services (EIS) of Ipswich, Massachusetts, is seeking a Team Leader to lead a software development team and to play a key role as an individual contributor.

The candidate will be responsible for taking ownership of development tasks that contribute to the implementation of features on the EBSCOhost web application. Completing these tasks requires the ability to read, interpret, and discuss business requirements and translate the requirements to code that meets departmental standards.

The position is based out of Hyderabad but the individual will work directly with EIS's EBSCOHost Application Engineering Group in Ipswich, MA. Travel to Ipswich may be required for training or other purposes.

Job Description:

- Lead a team of software developers to deliver high quality software.
- Utilize the .NET framework and the appropriate client side frameworks to develop multi-tiered web applications consisting of reusable components and services.
- Document and diagram the design of solution interfaces, implementations, and dependencies.
- Provide detailed task definitions and time estimates for project deliverables.
- Create unit tests to ensure functional integrity of solutions.
- Troubleshoot application issues down to the network protocol level.
- Collaborate with development team members to create a consistent approach across feature implementations.
- Participate in code reviews and play an active role in ensuring best practices are enforced in all team development work.
- Communicate effectively with requirements and QA groups.

Must Have:

- 5-7 years of software development experience
- 5+ years experience with object-oriented design/development with Design Patterns
- 4+ years experience with C#, .Net, ASP.Net, Web-forms, LINQ, XML, XSLT
- 4+ years experience with .Net Web Services, SOAP, WCF
- 3+ years experience with JavaScript, AJAX, JS Frameworks (jQuery, KnockoutJS)
- Strong track record of effective team leadership and project success.
- Excellent verbal communication.
- Excellent written communication.
- Positive attitude & team player. obstacles, issues and resource conflicts

Nice to Have:

- Some experience with HTML5 and CSS.
- Test-driven development experience
- Rich Internet Application development using AJAX and jQuery
- Experience with an MVC framework
- Core JavaScript
- Self-directed work ethic and willingness to foster new ideas.
