

Team Leader - .Net Technologies

(Immediate Requirement)

Req. # 5052

About Company:

NISC Export Services (NES), a strategic software development partner of EBSCO Information Services (EIS) of Ipswich, Massachusetts, is seeking a Team Leader to lead a software development team and to play a key role as an individual contributor on the EBSCOhost Database Services Engineering development team. We are looking for an excellent engineer to help support existing applications as well as contribute to the development of new project initiatives.

The candidate must be able to quickly come up to speed on the existing product and take an active role in discussions of architecture, design, development, and troubleshooting issues. Candidate should be able to execute the design, analysis, or evaluation of assigned projects using sound engineering principles and adhering to organizational standards, practices and procedures. In addition, candidate must have good organizational skills and have the ability to collaborate and work directly with our internal customers to solve complex business and technical issues.

The position is based out of Hyderabad but the individual will work directly with EIS's development teams in Ipswich, MA. Travel to Ipswich may be required for training or other purposes.

Job Description:

- Lead a team of software developers to deliver high quality software.
- Develop and sustain software systems (web services, middle-ware, database tables, stored procedures)
- Collaborate with requirements analysts and developers from around the organization to develop approaches for implementing features and/or resolving problems.
- Analyze functional requirements and accurately scope and estimate projects.
- Write software design specifications and supporting documentation.
- Work with QA to develop comprehensive test plans and performance metrics.
- Research, diagnose, and troubleshoot code and/or system defects.
- Create unit tests for continuous integration.

Must Have:

- 6-7 years of software/database development experience
- 3+ years building enterprise-scale systems in SQL Server
- 3+ years with object-oriented design/development principles
- 3+ years experience with .Net technologies
- 2+ years writing technical documents/specifications and comfortable documenting functionality/applications as required to benefit dev and QA teams.

- Strong track record of effective team leadership and project success.
- Excellent verbal communication.
- Excellent written communication.
- Positive attitude & team player.

Nice to have Skills:

- Experience working with Agile software development methodologies a strong plus.
- Self-directed work ethic and willingness to foster new ideas.
