

# Senior Software Engineer - C#/.Net and MS SQL Server

## (Immediate Requirement)

---

### Req. # 4940

#### **About Company:**

**NISC Export Services Private Limited (NES)**, a strategic software development partner of EBSCO Information Services (EIS) of Ipswich, Massachusetts, is seeking a Senior Software Engineer to play a key role as an individual contribution on the EBSCOhost Database Services Engineering development team. We are looking for an excellent engineer to help support existing applications as well as contribute to the development of new project initiatives.

The position is based out of Hyderabad (Cherlapally) but the individual will work directly with EIS's development teams in Ipswich, MA. Travel to Ipswich may be required for training or other purposes.

EBSCO Information Services, Ipswich MA, is a leader in the on-line reference marketplace selling to libraries, corporations and medical institutions worldwide. EIS's unmatched content, usability and service make EBSCOhost® databases the most-used online information resources for millions of researchers in thousands of institutions worldwide. Its technical expertise and superior products have resulted in tremendous growth over the last few years, creating an excellent employment opportunity for a Senior Software Engineer.

#### **Job Description:**

- Develop and sustain software systems in middle tier and in database layer (web services, middle-ware, database tables, stored procedures)
- Collaborate with requirements analysts and developers from around the organization to develop approaches for implementing features and/or resolving problems.
- Write software design specifications and supporting documentation.
- Work with QA to develop comprehensive test plans and performance metrics.
- Research, diagnose, and troubleshoot code and/or system defects.
- Create unit tests for continuous integration.

#### **Must Have:**

- 4+ years of software/database development experience
- 3+ years building enterprise-scale systems in SQL Server
- 3+ years with object-oriented design/development principles
- 3+ years experience with .Net technologies
- 2+ years writing technical documents/specifications and comfortable document functionality/applications as required to benefit dev and QA teams.

- Bachelors degree
- Excellent verbal communication.
- Excellent written communication.
- Positive attitude & team player.

**Nice to Have:**

- Experience working with Agile software development methodologies a strong plus.
