

Senior Software Engineer - C#.Net and MS SQL Server

Job Id: 7051 Requirement : 3 positions.

Req. # 7051

Position Overview

NES provides cutting edge technology for one of the leading players in the online publishing product space, and is seeking a **Senior Software Engineer** to play a key role in the **Engineering Development teams**.

Essential Functions:

- Develop and sustain software systems in middle tier and in database layer (web services, middle-ware, database tables, stored procedures)
- Collaborate with requirements analysts and developers from around the organization to develop approaches for implementing features and/or resolving problems.
- Write software design specifications and supporting documentation.
- Work with QA to develop comprehensive test plans and performance metrics.
- Research, diagnose, and troubleshoot code and/or system defects.
- Create unit tests for continuous integration.

Skills

Must Have:

- 7+ years experience in Development experience using
 - .NET Framework 3.5 and 4.0
 - ASP.NET, Web Forms, WCF and Web Services
 - C#, ADO.NET and LINQ
 - CSS, AJAX, JQuery, HTML, DHTML, JavaScript, XML, XSLT and XSD
 - Experience with the Visual Studio 2010.
 - SQL Server 2005 and 2008
 - SQL Server experience, including logical design and programming.

Nice to Have:

- Experience working with Agile software development methodologies a strong plus.
- Understanding of Software Development Life Cycle
- Strong interpersonal skills.
- Self-motivated work ethic.
- Creative, analytical, and fast thinker.
- Excellent verbal communication.
- Excellent written communication.
- Positive attitude & team player.

Company Profile

NES provides quality metadata services to world-class database publishers and institutes of higher education. We deliver unmatched value through a combination of process excellence, quality control and services such as information & content development, metadata modeling, controlled vocabulary services, data preparation, software development, product quality control & assurance, specialized email and technical phone support apart from assisting with product development. NES is renowned for its mastery in the de-duplication of bibliographic and metadata records through the creation of composite records
